## ABOUT US

*JAPAR was founded in 1986 as a limited company. We are a leading manufacturer and designer of concealed cisterns, flushing cisterns, fill valves, internal mechanisms, toilet seats, bath and floor drains. The Japar product range is enlarging thanks to the research and development activities.*

*Japar provides a lot of advantages for its customers, such as:*

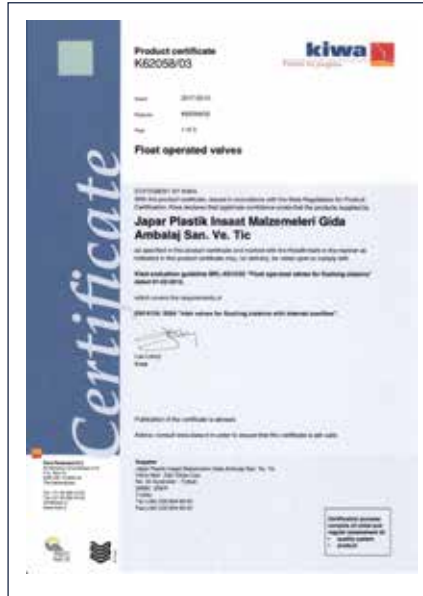

- *Japar promises short lead time in production and product development because the injection molding machines and the duroplast presses as well as the mold shop are in house.*
- *Japar's Quality Management System is certified ISO 9001:2015 by TÜV.*
- *Japar's fill valve is certified by KIWA.*
- *Japar's toilet seats are certified NF by CSTB.*
- *Japar's facility is located 30 km away from Turkey's biggest seaport which provides big logistic advantages.*

*Our aims are not limited to expansion and modernizing only, rather we mean to further develop JAPAR's high-quality, reliable and functional products to compete successfully in the global market.*

*Our latest invention is the Sense Concealed Cistern.*

*A concealed cistern which operates with Touch-Free sensor control, provides 3/6 L discharge. We added the following advantages; Hygienic, robust against vandalism, different glass designs, works with batteries - 100.000 cycles / guarantee.*

# QUALITY CERTIFICATES

In the Japar factory, production is made in accordance with world standards and environmental responsibility. Every product produced passes the required quality tests before it reaches the customer.
